PREFACE

For an informed management regime to ensure sustainability of the marine fisheries, it is essential not only to have reliable information on the status of marine fish resources along with fishing effort expended but also the number of fishing villages, landing centres, fisherfolk population, their occupation status, fishing crafts, fishing gears and other related parameters. With this objective, the Central Marine Fisheries Research Institute (CMFRI), Cochin has been conducting frame surveys at periodic intervals. Marine fisheries census on an all India basis was last conducted by CMFRI during May-July, 1980. Since the last census, the marine fisheries in India have witnessed both qualitative and quantitative changes. Post 1980 was also been a period where a number of management/policy interventions were made by the Government of India and the maritime states for ensuring sustainability, conservation of resources and to protect the interests of artisanal fishermen. Surely, the policies and interventions need to be reviewed and fine tuned in view of the highly dynamic nature of marine fisheries. For this a strong realtime and reliable database on various aspects of marine fisheries is essential. Recognising such a need, Department of Animal Husbandry, Dairying & Fisheries (DAHD&F), Ministry of Agriculture (MOA), Govt. of India, has taken up during the 10th Five Year Plan, a programme on Strengthening of Database and Information Networking for Indian Fisheries Sector in which Marine Fisheries Census is a major component. Recognising the expertise and experience of CMFRI in conducting such massive census surveys, the DAHD&F, MOA has entrusted the task of conducting the All India Marine Fisheries Census in the mainland to CMFRI.

Frame of the survey, namely, the marine fishing villages available with CMFRI was validated and updated with the latest information obtained from the respective maritime states. After identification of census parameters such as the

population size, education, religion, occupation, number of crafts and number of gears etc., the necessary schedules were designed to collect information and these were approved by the Technical Monitoring Committee set up by DAHD&F, MOA.

The census was conducted in two phases with the first phase covering all the maritime states and Union Territories except Tamil Nadu and Pondicherry which were covered during second phase. The first phase was conducted during April-June, 2005 and the second during November-December, 2005. Over 300 CMFRI staff (Scientific and Technical) supervised the field level and zonal level census operations ensuring proper collection of relevant data. A total of 1,492 field enumerators mostly drawn from the fishing communities/fishing villages covered 3,202 marine fishing villages. After completion of the census in both the phases, the data were sent to headquarters for processing and preparation of reports. The software required for data entry, data validation and processing was developed by the scientists of Fishery Resources Assessment Division, CMFRI.

The final report (containing two parts) on the marine fisheries census on an All India basis with respective state summaries including the scope, census parameters, their definitions, the types of schedules and instructions for collection of data was released by Shri.P.M.A. Hakeem, I.A.S., Secretary, DAHD&F, Ministry of Agriculture, Govt. of India on 25 July 2006 at Krishi Bhavan, New Delhi.

The rapid census exercises and the information supplied by the state department resulted in the finalization of 156 marine fishing villages spread over three districts in Karnataka. Conscious efforts were made to avoid villages that were estuarial and other inland fishery regions. Further in the villages only those households were selected where at least one member of the family was involved in marine fishing or allied activities. This publication (Part III of the Census report) summarises the districtwise census data of Karnataka covering a range of information right from the population bifurcation among Karnataka fisherfolk to the ownership pattern of different craft, either full or partial. For a better understanding of the craft and gear ownership vis-à-vis occupational fishing, specially assorted information on number of households, which thrives by fishing

without any wherewithal, has also been presented. Such incisive processing will be of much use to the planners and state authorities, whose primary objective is targeted towards the 'have-nots' of fishery. This report contains an exhaustive list of fishing villages of Karnataka along with their socio-occupational profile including the craft and gear infrastructure segregated sector-wise.

I take this opportunity to thank the DAHD&F and the Indian Council of Agricultural Research (ICAR) for entrusting CMFRI with this onerous responsibility, which has been completed within a reasonable time span. Special mention is required to laud the role played by CMFRI personnel especially, Dr. C. Muthiah, SIC, Mangalore Research Centre of CMFRI, Dr. V.S. Kakati, SIC, Karwar Research Centre of CMFRI and the associated scientific and technical staff who made this venture a success with their dedicated and tireless efforts. I hope this report in this current shape and form will be of immense utility to the quintessential observer of Indian Marine Fishery.

SUMMARY

Marine Fisheries Census 2005 was carried out in three districts of Karnataka namely Uttar Kannada, Udupi and Dakshin Kannada during April-June 2005. The scope, time frame, the parameters, their definitions and types of schedules used are described in Part I and Part II of the Marine Fisheries Census Report. The salient features are summarised below:

- There were 156 marine fishing villages in Karnataka, 14 were in Dakshin Kannada, 59 in Udupi and the rest 83 in Uttar Kannada district.
- The total number of fishermen households in Karnataka was 30,176 of which 53% in Uttar Kannada, 34% in Udupi and 13% in Dakshin Kannada districts.
- Marine fishermen population in Karnataka was 170,914. Adult males and females constituted 36% each and children 28%. Fishermen concentration was higher in Dakshin Kannada district followed by Udupi. Average population per village was 1,096. There were 968 females for 1000 males among them.
- Average family size in fisherfolk of the Karnataka state was 5.66.
- In Karnataka 31% of the fishermen possessed primary level of education, 29% secondary level and 10% possessed above secondary level of education. About 30% of the fishermen population had no formal education. Nearly 80% of the marine fisherfolk in Udupi district had some level of formal education followed by Dakshin Kannada (69%) and Uttar Kannada (62%).
- Of the 30,176 fishermen families, 90% were Hindus, 9% Islam and the rest 1% were Christians. About 6.5% of the fisherfolk families belonged to either scheduled caste or scheduled tribe.
- Active fishermen constituted 22% of the marine fisherfolk population, of which 86% were full time fishers, 11% were part time fishers and the remaining 3% were occasionals.
- Of the full time fishermen, 52% were from Uttar Kannada district, 39% from Udupi and the rest 9% from Dakshin Kannada district.
- 14% of the fishermen families were having membership in co-operative societies out of which 75% had membership in fisheries co-operatives. Co-operative membership was maximum in Udupi district.
- Trawlers, gillnetters and purse-seiners were the main craft of the mechanized sector and plank built boats and canoes were more in the artisanal sector.

Marine Fisheries Census 2005

There were 15,655 craft in the fishery employed in marine fishing of which 7,577 were traditional non-motorized, 3,705 were motorized and 4,373 were mechanized craft of which 2,515 were trawlers and 1,254 were gillnetters.

- In Karnataka, marine fisherfolk owned 10,622 fishing craft out of which 71% were traditional non-motorized, 19% were mechanized and the rest motorized craft. Of the 2007 mechanized crafts owned by the fisherfolk 1018 were trawlers, 633 were gillnetters and 253 were purseseiners. The number of families having shares in fishing craft was maximum in Udupi district.
- Important gears of Karnataka were hooks and lines, drift nets, trawl nets, fixed bag nets, long lines and scoop net. Sharing pattern was more visible in trawl nets and seine nets.
- Nearly 43% of the fisherfolk families involved in fishing possessed neither craft nor gear.
- Only 4% of the fisherfolk families were found to own some electronic gadgets / life saving equipment.
- In Karnataka, nearly 85% of the houses where marine fisherfolk families live were found to be pucca and in Udupi district 99% of the fisherfolk houses were pucca.
- There were about 1,091 educational institutions in the marine fishing villages of which 74% were primary schools, 19% were secondary.
- All the marine fishing villages were electrified and 98% were connected by road.
- There were 152 ice factories located in the marine fishing villages of which 73 were in Udupi, 45 in Dakshin Kannada and 34 in Uttar Kannada districts.

TABLES

Marine Fisheries Census 2005

TABLE 1. DISTRICT PROFILE

District	No. of landing centres	No. of fishing villages	No. of fishermen families	Fisherfolk Population
Dakshin Kannada	11	14	3,833	22,352
